

## Description

**Dear Physician,**

Your Quest ends here!

MyHealthAngels is an Innovative Web Platform in the health sector, combining the management of your Clinic or Medical Organization (multi-clinic, Laboratory etc) with the active participation of your patient. MyHealthAngels is available through the internet, providing services to you, the physician and to your patients, in line with the International Evolutions of e-health, fully supporting the traditional organization of a clinic or multi-clinic, but also providing the ability to the patient, to have a Personal Health Record.

With MyHealthAngels, you can be transferred easily from your old software, to a new modern organized Web environment, suitable for you, who want to be in line with the International Evolutions of e-health. MyHealthAngels Service is based on an innovative, modern, and reliable software hardware - architecture, in which it is readily available over the Internet (SaaS-Software as a Service), ensuring maximum availability at any time (24x7 operation) without any installation while providing the ability to upgrade features and functionalities (4 times a year) without your intervention and without having you stop your daily activities.

For you, the modern physician, MyHealthAngels provides a very effective way to organize your daily tasks while providing you the ability to exchange directly information and medical data with your patients, with full discretion, by providing you with **Clinical Health Record**. MyHealthAngels allows you to have easy and at a glance, a comprehensive overview of the medical history, examinations, medical notes, procedures, allergies with auto-alert, medications taken and any other important medical data of your individual patient in one screen, to facilitate the assessments and your diagnosis, save you time and everything is well organized and tidy. The **Clinical Health Record** is complete and easy to use, with quick and effective extraction of clinical conclusions about the past, the present and the future of the patient!

Today, the system supports e-Prescription by connecting to the governmental system (in Greece), so, now you (the Physician) may prescribe medication within the MyHealthAngels Platform! The application has an internal connection to the e-prescription system, so you do not need to keep changing systems for administering medication. MyHealthAngels immediately notifies you that the examination results of your patients are out, so that you can intervene fast and effectively for the diagnosis!

The patient gets his/her own Personal Health Record, with all the Medical Data gathered and organized in one place, Secured. Your patients do not need to carry any more their medical information (exams, laboratory results etc.), or trying always having them in the right order (chronological or other), while

### APOLLO SA

2 Viantos Str & 161 Lenorman Ave, 10442, Athens, Greece  
T:210 7489200 – F:210 7489105 - U: [www.apollo.gr](http://www.apollo.gr) - E: [info@apollo.gr](mailto:info@apollo.gr)

the risk of loss or corrupted data is eliminated. The Personal Health Record is consistent, because the data are recorded in a completed and structured manner and are constantly updated. The service is immediate and increases the quality of care, avoiding duplications, delays and mistakes. It provides constant communication and cooperation with the Physician, in a way that critical health data can be shared bidirectional, secure!

The e-notification feature, immediately notifies the patient that the exam results that were received from you the Physician, updated the patients Personal Health Record. Your patient also has the ability to be informed about personal and family care, by subscribing to the prevention and health promotion services provided through the MyHealthAngels system. A great new Service for your patients!

Furthermore, MyHealthAngels enables secure communication and collaboration with third parties such as diagnostic centers etc. (once they have MyHealthAngels Service too). Using the API connection interface, the system can upload the final laboratory results automatically to the CHR of the Physician, and the Personal Health Record of the patient. MyHealthAngels is a valuable and useful tool, which allows you to have centralized management of your cooperation with your colleagues and partner health Providers, without even the need of your physical presence, because it provides you the ability to get connected from anywhere through Internet, so that you gain valuable time.

MyHealthAngels is based and includes all major international standards of medical information systems (such as HL7) and dictionaries (such as ICD-10, ICPC-2: International Classification of Primary Care), while the data is exchanged in the most secure manner. Thus, your medical information is protected both during transport and storage with high level security encryption algorithms.
