

Unique Advantages of MyHealthAngels

Dear Physician,

Your Quest ends here!

MyHealthAngels is an Innovative Web Platform in the health sector, combining the management of your Clinic or Medical Organization (multi-clinic, Laboratory etc.) with the active participation of your patient. MyHealthAngels is available through the internet, providing services to you the physician and to your patients, in line with the International Evolutions of e-health, fully supporting the traditional organization of a clinic or multi-clinic, while providing the ability to the patient to have a Personal Health Record.

The future is here! All modern trends of e-health lead to the new digital era, that MyHealthAngels offers. If you do not do it, you your competition is going to!

For you, the Doctor it offers:

- **Full Utilization of your Existing clientele** through the transfer and integration capability of the demographic data of your patients
- **Full management of your clinic or Medical Organization with safety and flexibility through Internet, in all your devices, with NO installation.**
- **Interact with your patients: It creates a new digital communication channel between you** (the physician) and the Patient, while respecting the rules of medical ethics and keeping the patient's personal data secure, thus creating and improves the physician - patient relationship.
- **Connection to the e-prescription system of the governmental system (in Greece).** You (the physician) can prescribe drugs through MyHealthAngels platform , without the need of a secondary prescription System!
- **E-Notification feature:** Automatic notification to you (the physician), regarding the laboratory results of your patient!
- **API connection:** the final laboratory results can automatically update the Clinical Health Records, and even the patient's Personal Health Record too (with cooperating medical institutions),
- **It is your choice which results, exams, etc. the patient is going to have access to.**

APOLLO SA

2 Viantos Str & 161 Lenorman Ave, 10442, Athens, Greece
T:210 7489200 – F:210 7489105 - U: www.apollo.gr - E: info@apollo.gr

- **Clinical Health Record (CHR)** for the proper organization of your, clinic or multi-clinic. Complete and easy to use, quick and effective for extracting clinical conclusions about the past, the present and the future of your patients!
 - Provides management services for diagnoses, patient visits, medical notes, measurements, medical history, appointments, medications, referrals, procedures, etc.
 - Quick and secure storage and recall of medical information, thus gaining time from searching.
- **Personal Health Record (PHR)** to your patients that provides management of their personal medical. Your patients do not need to carry any more their medical information (exams, laboratory results etc.), or trying always having them in the right order (chronological or other), while the risk of loss or corrupted data is eliminated. A great new Service for your patients!
- **A unique approach in the exchange of medical data between you and your patients.** Physicians and patients can exchange information through the platform. The patient is cooperating better and more accurate with you, thereby he is always "in line" with you, the Physician.
- Referral to another Physician or to a laboratory: the system generates referrals for use to other physicians or health providers.
- **Constant upgrades of the functionalities of the platform** that are immediately available to you, without having to stop your daily activities (4 times per year).
- **Collects information regarding: health status, preventive medicine, fitness and nutrition** from your patients.
- **Supports actions regarding the improvement of the patient's health**, while giving countervailing benefits & motives in order that the patient's disease is 'monitored' more effectively.
- **Secured Medical Data**, during transportation and storage, by using powerful & complex encryption algorithms! Furthermore each account and each transaction is completed and stored separately, for maximizing the level of security.
- **Based on major international standards** of medical information systems (such as HL7) and dictionaries (such as ICD-10, ICPC-2: International Classification of Primary Care, and are always updated to the full range of Greek and international medical encodings (eg ICD-10).

APOLLO SA

2 Viantos Str & 161 Lenorman Ave, 10442, Athens, Greece

To your Patients, MyHealthAngels offers the following:

- **A Personal Health Record, with all of the data gathered together, organized.**
 - The Personal Health Record is consistent, because the data are recorded in a completed and structured manner and are constantly updated.
 - The service is immediate and increases the quality of care, avoiding duplications, delays and mistakes.
- **The ability to be in constant communication and cooperation with the Physician, in a way that critical health data can be shared bidirectional, secure!**
- **No need to "carry" the medical file, the file is always available through Internet.**
- **The Personal Health Record is automatically maintained: cannot be damaged** by 'time' like the ordinary paper-type health records, always in the correct order (chronological or other).
- **E-notification feature: Automatic notification of the available laboratory results for the patient,**
- **Ability to automatically update the patient's Personal Health Record with data from the physician or health provider.**
- **Ability to Update the Personal Health Record Data, directly from the Patient!** This Service is extremely important because it gives the opportunity to Patients with chronic diseases (diabetes , arterial hypertension etc.) to register themselves directly the taken measurements (blood glucose, blood pressure etc.), thus preserving and keep tracking
- **The citizens become "owners" of their health: They get informed automatically about issues regarding health and prevention that they choose.**
